Name: Muhammad Ahmad ghazi

Age: 14 years old

Current Location: Karachi, Province Sindh, Pakistan

Am I employed: No, I am not currently employed

My contact no.: 03102819000

My email: bidanikhan092@gmail.com

What I know about Front-end Web development?

I have been working with front-end websites for over 4 years, I have mastered my expertise taking from the most basic Html & CSS templates to advanced WordPress custom theme development I have created many projects related to several languages I have a strong control over html, CSS, JavaScript, and also the libraries and frameworks they are used with for example I am experienced in SASS, SCSS, Bootstrap 3, Bootstrap 4, jQuery.

With all that experience I believe I am an efficient programmer; I always keep myself up for the challenge to create my projects efficiently but with the finest qualities. It has always been my target to keep things fast, efficient, and of Fine Quality.

My Backup Skills

Apart from frontend development, I also have a little idea of PHP I have created projects with PHP in the past because it is a crucial skill for front end as well.

I am also confident I can do basic graphic designing and I am familiar with the softwares for Graphic designing ex: Adobe Illustrator, Adobe Photoshop.

I do also possess 6+ years' experience in video editing and I have used that skill for the growth of my YouTube channel with proper SEO.

About Me

I am known everywhere for my excellent skills in such a small age, I have been pretty devoted to Web Development since the age of 10 and I started learning from W3School but later on I started learning from an already experienced employ. I like to make animations and Everything is basically fun to me until it stays in the boundaries of a computer from writing a MS word page to making animations or maybe even doing Search Engine Optimization even making Thumbnails everything related to tech is my hobby I want to turn some of my skills in a Passion.
